Seminar on Global Crude Oil Prices Impact and Policy By Mr. Bhaskar J. Kashyap

A seminar on the topic "Global Crude Oil Prices Impact and Policy" organized by ECONOX - The Department of Economics at College of Vocational Studies, Delhi University as part of Engima 4.0 was conducted on 13th October 2022 at 11:00 AM in the seminar hall. The guest speaker for the same was Mr. Bhaskar Kashyap, Assistant director at NITI Ayog.

He began by emphasizing the essentiality of crude oil as a source of energy and that India meets 85% of its crude oil needs through imports. Its price, however, is notoriously variable because of the dramatic price increase caused by the Pandemic and the ongoing Russia-Ukraine war. He also explained why oil prices are so variable. Oil is a product that is fungible and tradable. Auctions are used to buy and sell oil. The demand and supply of oil is inelastic and the main reasons for this are that 95% of vehicles operate on oil along with some geopolitical reasons.

The attendees discovered how an increase in Oil Price can lead to Recession. The first oil shock occurred in 1973, then the Iran War (OPEC Member) raised prices again in 1978, which was followed by a recession. High inflation, a budget deficit, a current account deficit, and declining currency reserves are the macroeconomic consequences.

Following that, a question and answer session was held, during which Mr. Kashyap answered students' questions and clarified their problems. Teachers were also thrilled to be able to join the session. The seminar concluded with a vote of thanks from the President of ECONOX to Mr. Kashyap. A token of gratitude was extended to Mr. Kashyap in the form of a sapling by Dr. Ashis Taru Deb, Teacher Incharge of the economics department at College of Vocational Studies, Delhi University.

About the speaker

Mr. Bhaskar J. Kashyap is an Assistant Director at Niti Aayog. Before this, he has been a consultant at Ernst & Young and worked with UNICEF.

Mr. Bhaskar holds experience in academics as well. He has been a research associate at Delhi School of Economics and a Research Assistant at Research and Information System for Developing Countries (RIS). He has completed his master's in economics from Delhi School of Economics.

Parle, founded in 1929, is a well reputed company and many of its products like Parle G,

Monaco and a variety of other biscuits are famous all around the world. The factories situated in Bahadurgarh, Haryana and Neemrana, Rajasthan are the two mother factories of Parle. It also has many other manufacturing units located all over the country.

After reaching the factory, the team was welcomed by the staff members and given a tour of the whole industry. Firstly, they were taken to the processing unit where they observed the manufacturing of Parle's well known products like Parle G, Monaco and Krack Jack.

Thereafter, everyone was asked to be seated inside a room where a presentation was put on display. The presentation was an animated short film which explained in detail about the working of Parle industry, the products manufactured by them, the ingredients used etc.

This was followed by a very interactive Q&A session in which the students asked numerous doubts related to the sale and revenue of Parle products and their future plans for growth of the company. All these doubts were very well clarified by a lady. In addition to this, she also provided information regarding various commodities invented by Parle which are prominent not only in India, but a few foreign countries as well. She even mentioned that their highest selling product is Parle G.

In the end, some refreshments were distributed to the whole team and a group picture was clicked to be kept as a memory of the visit. Everyone then came back to the college in the evening.

About the Project

We at Enactus CVS observed and saw an opportunity around improper disposal of UCO (Used Cooking Oil) and came up with the idea of using this UCO to create 'Ayuda' soaps. Later, we started to cater for another problem around the 'underutilisation of goat milk' which leads to low and unstable income for goat herders. This led to the creation of 'Ayuda Skin Care+' soaps which are made out of 'goat milk'.

Our Communities

As of now, our project works closely with 2 communities. The first community is Sewa Bharti, an NGO based in Rohini, New Delhi. The second community is Jagrukta SHG, an SHG based out of Ropar, Punjab, in collaboration with the Government of Punjab.

Achievements

In the year 2021-22, Project Abyaan was one of the top 12 Projects qualified in One Race for Ocean where various Enactus projects compete at the global level. Our project was the first runner-up in the '6th National Social Enterprise Idea Challenge' organised by Azim Premji University, Bangalore.

About the Project

Project Ikhtiraa tries to alleviate the issue of microplastics by replacing the usage of plastic in tea bags with muslin cloth while also empowering various communities by providing them with a steady source of income.

Additionally, we strive to maintain the dying Indian pottery culture.

Our products

There are four different flavours of Ikhtiraa tea bags: lemongrass chamomile, chamomile, lavender and tulsi.

Instead of the usual paper plastic, the tea bags are made of muslin cloth. The tea bags are hand-sewn by people of our linked community instead of using staples.

Our local potter community is our source of clay items.

Our partners

Project Ikhtiraa is in the first year of its life cycle. Our current partner for the project is the Young Women's Christian Association (YWCA) in Delhi, which is an organisation dedicated to uplifting women in all spheres of life.

RESEARCH AND DEVELOPMENT

Enactus CVS's Research & Development Department consists of two wings that focus on internal work and external collaborations. They follow a process of problem identification, ideation, market analysis, competitor analysis, and prototyping to bring projects to fruition. This year, the department aims to elevate existing projects to new levels by expanding them.

On-ground visits

Enactus CVS organized on-ground visits which allowed the members to gain practical knowledge and gather information about the ongoing projects along with ideas about new projects.

CORE R&D

S.NO VISIT MONTH

1. Chandini Chowk October 2022
2. Delhi Haat November 2022
3. Delhi Haat March 2023

In addition to the aforementioned, the R&D department has also undertaken various other endeavours which are as follows:-

Market research around tea bags

As a part of one of our projects, market research was conducted to collect data of flavours of the tea which were most prevalent in the market; these flavours were then tested and the ones with the maximum consumer response were launched. Research on the shape of the tea bags and packaging was also conducted followed by prototyping. Two-level packaging was developed to ensure product protection and enhance freshness. The R&d department has researched the following during this tenure-

Coffee cherry pulp: For every kilogram of roasted coffee that people consume, an equal amount of waste is left behind in the producing countries; so to tackle this problem, the discarded coffee cherry pulp can be upcycled and turned into flour which has various applications.

Hydroponics: It is a subset of Hydroculture, which means growing plants without soil using mineral nutrient solutions in an aqueous solvent ensuring a high production rate and increasing water efficiency by 90%.

Seaweed protein bars: As seaweed is now gaining popularity for its versatility and is rich in roughage which helps mitigate the major problem in protein bars, our team came up with this idea to incorporate edible seaweed with protein bars providing a healthier and sustainable option for consumers.

BSG cookies: Every year, tons of Brewers' Spent Grain(used in the production of barley-based beverages) is sent to the landfill or used to feed livestock, instead of utilizing it. As most of the carbohydrate and sugar content has been extracted for the production of the beer itself, the BSG is left with fibre and protein making it nutritious. The objective is to make guilt-free, savoury, and sweet treats(starting with cookies), creating a healthy snacking alternative.

DIVERSIFICATION & PRODUCT EXPANSION

HUL(Hindustan Unilever Limited) to diversify and expand the product line of Project Abyaan. They focused on converting UCO soaps from hand soaps to bathing soaps, using natural and environmentally friendly ingredients, and extending their shelf life. They also explored the potential uses of UCO beyond soaps, such as lamp oil, car

cleaner, and paint remover. Extensive research on coffee soaps was also conducted to develop the recipe and method from scratch.

Certification & Licensing

A newly added vertical of Project Abyaan which comes up with soaps made out of coffee grounds has been researched and recently tested and certified by the lab.

Enactus CVS also came up with Tea bags made from muslin cloth that attenuates the microplastics present. These tea bags have been tested by labs and certified, making them safe to consume.

Training

Enactus CVS provides training programs to both community members and newly recruited members, including skills such as reverse engineering and pitching to potential clients. These activities enable members to develop valuable skills like project ideation and contribute to the growth of Enactus' vision. Additionally, Enactus CVS offers skill development sessions to communities involved in their projects to hone their existing skills or acquire new ones.

EXTERNAL COLLABORATIONS

Enactus CVS is also involved in establishing self-help groups in **Najafgarh** as a collaboration with the Delhi government under the National Urban Livelihood Mission. The goal is to create self-sustaining large-scale businesses and generate employment opportunities for women. The department's efforts in this area have gained recognition, including coverage in newspapers and appreciation from current Revenue and Transport Minister of Delhi, Shri Kailash Gehlot.

OVERWHELMING DAY

16TH February, 2023

We at Manas organised a fun-filled campaign with the intent of giving people a platform to let out what might be bothering them in a safe and interactive atmosphere.

For our campaign, two immersive activities were conducted.

In one of which, students wrote their causes of frustration or anxiety and purged it in the bowl of fire. The other activity involved the audience participating in 'Never Have I Ever'. Wherein, students aimed at a cup with a prompt stating something they had never done. This was indeed a great way for everyone to share a good experience.

Team Manas values everyone's participation and love. With unprecedented amounts of support given to us, we're sure to make more people smile along the way !

GAME OF EMOTIONS

23rd March, 2023

Manas ran a fantastic campaign to encourage students to let their emotions flow like the ocean. In support of our campaign, we engaged in two exciting activities. In one of them, students expressed their emotions by doodling in the pie of emotions.

By completing the phrases they chose from the jar, students in the other activity were prompted to consider their own personal beliefs.

We think this campaign was a successful attempt to help individuals address their emotions head-on with acceptance and love, allowing them to be who they are and giving them the freedom to flow and move without always suppressing them.
