

6.2.1. The institutional Strategic/ perspective plan is effectively deployed

The strategic plan of the college was to improve its infrastructure, and part of it was completing the work on the second new building. This new building is meant to help students learn better by adding more classrooms and activity rooms. The idea is to make it easier for teachers to give tutorials and lectures, and for students to do different activities. To get this building done, the college made payments to Viva Associates with clearance from the general body to make sure everything was done well and on time. This step is a big achievement in the college's effort to improve its educational facilities. The new building is a sign of the college's commitment to giving students a good place to learn. This progress in infrastructure is a big step for the college as it keeps working towards making education more enriching for students.
